

# Streets and Drainage

**Hawkins-Weir Engineers, Inc.**

Hawkins-Weir has worked with numerous municipal and private sector clientele in designing projects ranging from small area drainage improvements to street and drainage improvements related to subdivision developments to multi-million dollar municipal street/drainage projects. These services include:

- Conceptual planning to determine the alignment and routing
- Economical assessment and feasibility studies
- Determination and identification of required right-of-way/easements
- Detailed design and planning
- Construction Administration and observation
