

CAD DESIGN TECHNICIAN EMPLOYMENT OPPORTUNITY

Hawkins-Weir Engineers, Inc. (HW) has CAD Design Technician career opportunities available for extraordinary candidates. These opportunities are available for individuals interested in a career with a progressive Arkansas based engineering firm whose primary focus is improving the communities that we live, work, and play in. Successful candidates have the opportunity to work in either our Van Buren or Little Rock, Arkansas office locations. We provide a rewarding and positive work culture and encourage our team members to maintain a healthy work/life balance. In addition to competitive salaries and benefits, HW provides our staff with modern hardware and software access to produce exceptional engineering projects. Successful candidates will exhibit a desire for engaging in a team environment on thought-provoking projects to improve our communities' drinking water, lakes, streams, parks, and roadways.

Responsibilities

- Perform design/drafting assignments, requiring advanced working knowledge of AutoCAD, AutoCAD Civil 3D, Revit, creating TIN surfaces, road profiles, cross sections, calculating cut/fill volumes, and preparing site plans for grading and earthwork.
- Interpret field survey data for existing sites to prepare land survey plats and drawings. Knowledge of property data research, property descriptions, and platting is a plus.
- Prepare structural and mechanical construction drawings of water/wastewater structures and details based on sketches provided by design engineers.

Requirements

- Associate's degree or completion of a technical trade school in CAD, drafting, or related field
- Good communication skills, both written and oral
- Experience using AutoCAD design software

Benefits

- Health/Dental/Vision Insurance
- Life Insurance
- 401K Retirement Plan with Employer Contributions
- Paid Time Off
- Seven (7) paid Holidays
- Short-Term and Long-Term Disability
