

## ENGINEER EMPLOYMENT OPPORTUNITY

---

A structural engineering position is available for an individual interested in a career with a progressive Arkansas based engineering firm whose primary focus is improving the communities that we live, work, and play in. The position will provide structural engineering design for a wide range of projects under the guidance of a Senior Engineer. We provide a positive and rewarding work culture and encourage our team members to maintain a healthy work/life balance. Opportunities are available at any of our four (4) office locations - Van Buren, Little Rock, Fayetteville, and Fort Smith. Depending upon the applicant's experience, consideration may be given to a remote working environment. In addition to competitive salaries and benefits, HW offers a flexible work environment. Our professional staff enjoys every other Friday off. We support our engineers' desires to form strong peer networks through professional and community organizations. Successful candidates will exhibit a passion for engaging in a team environment on challenging projects to improve Arkansas's drinking water, lakes, streams, and roadways.

### Requirements

- Bachelor or Master of Science in Structural Engineering or Civil Engineering with an emphasis on structural design
- Professional Engineering Registration or Engineer Intern Registration in Arkansas, or the ability to obtain registration through reciprocity
- Knowledgeable in the design of structural steel, reinforced concrete, and masonry
- Proficient with structural engineering analysis and design software such as RISA
- Well organized and the ability to work independently on assignments

### Benefits

- Health/Dental/Vision Insurance
- Life Insurance
- 401K Retirement Plan with Employer Contributions
- Paid Time Off
- Seven (7) paid Holidays
- Flex Time
- Professional Development Opportunities
- Community Involvement
- Short-Term and Long-Term Disability
- Opportunities for Advancement
